

Yale Fire Safes

Like every Yale quality assured product, the new range of Yale Fire Safes has been designed with your peace of mind in focus. The entire range has been built and thoroughly tested to withstand intense heat and humidity, leaving your most precious documents in good hands. The Yale Data Fire Safe contains an additional "safe within a safe" insulation layer. This protects passports, paper documents and extra sensitive digital data, whether they are on an external hard-drive, CD ROMs, DVDs or tapes from fire.

All Yale Fire Safes are equipped with a unique digital security keypad unlike any other on the market today. A scramble number input enables personal codes to be hidden within longer sequences of numbers, whilst additional access codes can be set for one time use, ensuring privacy no matter who is in the room when accessing your safe. These state-of-the-art fire safes have been carefully designed to be worthy of your confidence and the Yale brand name.
